# **Appendix A: Non-GAAP Reconciliations**

# Non-GAAP Reconciliation: Tangible Common Equity and Tangible Assets

Some of the financial measures included in this presentation are not measures of financial performance recognized by GAAP. These non-GAAP financial measures include "tangible common equity to tangible assets," "tangible book value per share," and "return on average tangible common equity." Our management uses these non-GAAP financial measures in its analysis of our performance and believes these are helpful to investors as an additional tool for further understanding our performance. The following table reconciles shareholders' equity (on a GAAP basis) to tangible common equity and total assets (on a GAAP basis) to tangible assets, calculates our tangible book value per share, and reconciles return on average tangible common equity to its most comparable GAAP measure:

# **Regulatory Reporting to Financial Statements: Adjusted Core Deposits**

Some of the financial measures included in this presentation and in forms 10-Q & 10-K filed with the SEC differ from those reported on the FRB Y-9(c) report. These financial measures include "core deposits to total deposits." Our management uses this financial measure in its analysis of our performance. The Bank measures core deposits by reviewing all relationships over \$250,000 on a quarterly basis. After discussions with our regulators on the proper way to measure core deposits, we now track all deposit relationships over \$250,000 on a quarterly basis and consider a relationship to be core if there are any three or more of the following: (i) relationships with us (as a director or shareholder); (ii) deposits within our market area; (iii) additional non-deposit services with us; (iv) electronic banking services with us; (v) active demand deposit account with us; (vi) deposits at market interest rates; and (vii) longevity of the relationship with us. We consider all deposit relationships under \$250,000 as a core relationship except for time deposits originated through an internet service. This differs from the traditional definition of core deposits which is demand and savings deposits plus time deposits less than \$250,000. As many of our customers have more than \$250,000 on deposit with us, we believe that using this method reflects a more accurate assessment of our deposit base. The following table reconciles the adjusted core deposit to total deposits:

	As of the year ended						
	2016	2017	2018	2019	2020	2Q21	
Core Deposits <sup>1</sup>	\$781,940	\$990,824	\$1,670,572	\$1,651,678	\$2,037,164	\$2,457,031
